

VERTEX[®]

888-298-5162

In 2004, four hurricanes hit the Florida coasts causing roughly \$41 billion in damage. The 2005 hurricane season has made a place in history. Many records were set with 28 named storms that included 15 hurricanes, 7 of which were rated at or above a Category 3 on the Saffir-Simpson Hurricane Intensity Scale. While 2006 has already had some early-season activity with three named storms, most of the projected activity is expected to occur from August to October.

This year, VERTEX can help your business - call today to find out how!

2006 ATLANTIC HURRICANE OUTLOOK

Tropical Storms:	12-15
Hurricanes:	7-9
